SUMMARY

.NET Full Stack Developer with **5+ years of experience** building scalable applications using .NET Core, C#, ASP.NET, and Angular. Strong expertise in RESTful API design, microservices architecture, and SQL Server. Experienced in developing cloud-native solutions on Azure and delivering high-performance applications in Agile Methodology.

SKILLS

Backend & Frameworks :	.NET Core, C#, ASP.NET Web Forms, Web Jobs, RESTful API Design and Development, Azure AD / Entra ID, JWT Authentication, Managed Identity.
Cloud (Azure) :	Azure App Services, Functions, Service Bus, Blob Storage, Key Vault, Azure Monitor, KQL, Log Analytics, Application Insights, CI/CD (Azure DevOps) Pipelines, Redis Cache.
Database & Data Management :	SQL Server (Stored Procedures, Views, Triggers), Entity Framework Core, ADO.NET, Azure Cosmos DB, LINQ.
Architecture & Design :	Microservices Architecture, Clean Architecture, Design Patterns (Repository Pattern, CQRS, MediatR(Mediator Pattern), Dependency Injection, Factory Pattern).
Frontend :	Angular(component-based architecture, REST API integration), TypeScript, HTML5, CSS3, Bootstrap.
Testing & Quality :	Unit Testing (NUnit / XUnit), Integration Testing, TDD, Mocking (Moq), SonarQube, Contrast.
Development Practices & Tools :	Git Version Control, Agile/Scrum, GitHub Copilot, Claude Code, API Management, NuGet Package Management, Swagger, Postman, UML, Structured Logging, Feature Flags, Technical Documentation, JSON/XML.

PROFESSIONAL EXPERIENCE

Ascendion Engineering Pvt. Ltd.(for Client Deloitte India) <i>Software Engineer</i>	Hyderabad, India — Apr 2024 – Present
---	---------------------------------------

Project: Audit Tool Automation Platform	Apr 2024 – Present
--	--------------------

- Currently working as a Fullstack .NET Developer on an Audit Tool Automation Platform for Asset Management clients.
- Working on a finance domain project to streamline audit processes for Asset Management clients.
- Fullstack development of a cloud-native audit automation platform using **.NET Core, C#, Angular, and Azure** services.
- Owned end-to-end Application development lifecycle including requirement analysis, design, development, testing, and deployment.
- Proficient in using **Azure App Services, Azure Functions, Azure Blob Storage, and Azure Key Vault** for building scalable and secure cloud applications.
- Experienced with ADO.NET, Entity Framework and LINQ, and for efficient database interactions with **SQL Server & Azure Cosmos DB**.
- Resolved critical production issues through root cause analysis, improving system stability and reducing downtime.
- Designed and optimized system components considering scalability, performance, and maintainability in a microservices architecture.
- Code coverage enhancement by adding unit tests(NUnit/XUnit) using **NUnit** and **Moq** for mocking dependencies.
- Validated APIs using Swagger and Azure API Management to ensure correctness and contract consistency.
- Strong analytical and problem-solving skills demonstrated through effective debugging and issue resolution.
- Good Utilization of **AI tools** like **GitHub Copilot** and Sidekick to boost productivity and code quality.
- Actively participated in Agile ceremonies including sprint planning, backlog grooming, and retrospectives.

People Tech Group Inc.
Associate Software Engineer

Hyderabad, India — Aug 2021 – Mar 2024

Project: Workforce Management (WFM) System

Oct 2022 – Mar 2024

- Built scalable backend services using **.NET Core** handling high-volume requests with optimized performance.
- Implemented RESTful services with REST API Development supporting workforce scheduling, availability management, and compliance workflows.
- Worked on real-time features using **SignalR** to support live updates and notifications.
- Integrated **Azure Service Bus** for asynchronous processing and background task execution.
- Angular frontend development using **TypeScript**, **HTML5**, **CSS3**, and **Bootstrap** to create responsive user interfaces.
- Used **Redis Cache** to improve application performance and reduce database load.
- Developed and tested REST APIs with focus on scalability, performance, and maintainability.
- Integrated CI/CD pipelines using Azure DevOps and ensured code quality using SonarQube.
- Troubleshoot and optimized database performance issues using SQL Server query tuning and indexing strategies.
- Knowledge in Microsoft stacks like Azure Cloud Services, Azure DevOps, and Application Insights for monitoring and diagnostics.

Project: MICADA – Government Irrigation Platform

Nov 2021 – Sep 2022

- Developed application modules using **ASP.NET Web Forms** for government irrigation management workflows.
- Web application development involving data entry forms, reporting dashboards, and user management features.
- Implemented backend APIs using **.NET Web API** to support data exchange between modules.
- Worked extensively with **SQL Server** to write queries, stored procedures, and reports.
- Implemented authentication and authorization using JWT and Azure AD (AuthN/AuthZ).
- Used Git for version control including pull requests, code reviews, branching, and merging strategies.
- Excellent communicator with strong interpersonal adaptability, proven cross-functional collaboration, disciplined time management, and a clear passion for delivering results.

Wealus Technology
Intern

Hyderabad, India — Mar 2021 – Aug 2021

Project: Internship Assignment

Mar 2021 – Aug 2021

- Assisted in backend development tasks using **C#** and **.NET Framework**.
- Worked with **SQL Server** to write basic queries and support data-related tasks.
- Fixed bugs and implemented small enhancements under the guidance of senior developers.
- Strong foundation on OOP's concepts and .NET programming principles with best practices.
- Gained hands-on experience with Git-based version control and collaborative development workflows.

EDUCATION

2016 – 2020 Bachelor of Technology in Computer Science & Engineering — **Chirala Engineering College**

(Sai Kumar Kalli)
